| <b>Signfish</b> , ASL Recognition Practice Platform                                                                                                                                                                                                                                                                                                                                                                     | March 2026          |
| <ul style="list-style-type: none"><li>Built a full-stack ASL practice platform with a Next.js frontend, FastAPI backend, and ML workspace for dataset preparation, model training, and live webcam inference in a team of 3</li><li>Implemented a computer-vision inference pipeline using MediaPipe hand landmarks, OpenCV frame processing, and a PyTorch MLP classifier for 24 static ASL alphabet classes</li></ul> |                     |
| <b>Arduino/CAD</b> , Automated Robot Car Catapult                                                                                                                                                                                                                                                                                                                                                                       | Jan 2026 — May 2026 |
| <ul style="list-style-type: none"><li>Programmed an Arduino-based car with integrated catapult mechanism for autonomous motion and projectile launching.</li><li>Designed CAD-modeled components and tested a launcher capable of clearing 20 cm+ obstacles with a ping-pong ball.</li></ul>                                                                                                                            |                     |

## SKILLS

- Programming Languages:** Python, C++, JavaScript, Java, SQL, HTML
- Technologies:** React, Tailwind CSS, Git, Linux, Google Cloud Platform

## SELECTED ACHIEVEMENTS

|                                                                          |          |
|--------------------------------------------------------------------------|----------|
| <b>International Olympiad in Artificial Intelligence (IOAI) 2025</b>     | Jun 2025 |
| Selected among the top 9 students in Indonesia from 60,000+ participants |          |
| <b>International Mathematical Olympiad (IMO) 2024</b>                    | Jul 2024 |
| Bronze Medal; ranked 3rd in Indonesia and 252nd worldwide                |          |
| <b>Asian Pacific Mathematics Olympiad (APMO) 2024</b>                    | Feb 2024 |
| Bronze Medal; Organized by Ministry of Education (MoE Indonesia)         |          |
| <b>National Mathematics Olympiad (OSN) 2023</b>                          | Sep 2023 |
| Gold Medal; ranked 4th in Indonesia from 30,000+ participants            |          |

## EXTRACURRICULAR ACTIVITIES

|                                                                                                                                                                                                                                                        |                    |
